Knowledge-Based SYSTEMS

INDEX TO VOLUME 3: 1990

AUTHOR

Agarwal, R and Tanniru, M Systems development life-cycle for expert systems 170
Alvarado, S J, Dyer, M G and Flowers, M Argument comprehension and retrieval for editorial text 139
Alvarado, S J, Dyer, M G and Flowers, M Argument representation for editorial text 87
Bobbie, P O Grouping knowledge-base data into distributable clusters 230
Booth, P A Using errors to direct design 67
Brightman, P Computers, choreography and creativity 42
Coyne, R The logic of design actions 242
Edmonds, E A and McDaid, E An architecture for knowledge-based front ends 221
Fu, L M and Fu, L C Mapping rule-based systems into neural architecture 48
Gains, B R Knowledge-support systems 192
Ishizuka, M and Matsuda, T Knowledge acquisition mechanisms for a logical knowledge base including hypotheses 77
Itoga, S Y, Chia, C L, Yost, R S and Mau, R F L Propa: a papaya management expert system 163
Jirku, P Nonmonotonic reasoning and logic programming 28
Jirousek, R A survey of methods used in probabilistic expert systems for knowledge integration 7
Kramosil, I Model-preserving transformations of databases for rule-based expert systems with Boolean-valued weights 21
Kuru, S and Bek, F Goal-driven blackboard control architecture based on extending partially complete general goal trees 236
Laenens, E and Vermeir, D Advanced knowledge-base environments for large database systems 215
Laske, O E Music composition as hypothesis formation: a blackboard concept of musical creativity 36
Lutcha J and Zejda, J Knowledge represented by mathematical models for fault diagnosis in chemical processing units 32
Moulin, B and Rousseau, D Designing deontic knowledge bases for regulaion texts 108
Ohsuga, S Framework of knowledge-based systems — multiple metal-level architecture for representing problems and problem-solving processes 204
Perez, A Failing of Dempster's rule of interval-given probabilities 13
Pospelov, D Hermeneutics in expert systems 25
Prat, A, Lores, J, Fletcher, P, and Catot, J M Back-end manager: an interface between a knowledge-based front end and its application subsystems 225
Tsai, J J-P and Weigert, T A knowledge-based approach for checking software information using a non-monotonic reasoning system 131
Vysoky, P Knowledge-based reconstruction 17

TITLE

A knowledge-based approach for checking software information using a non-monotonic reasoning system **Tsai, J J-P and Weigert, T** 131
A survey of methods used in probabilistic expert systems for knowledge integration **Jirousek, R** 7
Advanced knowledge-base environments for large database systems **Laenens, E and Vermeir, D** 215
An architecture for knowledge-based front ends **Edmonds, E A and McDaid, E** 221
Argument representation for editorial text **Alvardo, S J, Dyer, M G and Flowers, M** 87
Argument comprehension and retrieval for editorial text **Alvarado, S J, Dyer, M G and Flowers, M** 139
Back-end manager: an interface between a knowledge-based front end and its application subsystems **Prat, A, Lores, J, Fletcher, P, and Catot, J M** 225
Computers, choreography and creativity **Brightman, P** 42
Designing deontic knowledge bases from regulation texts **Moulin, B and Rousseau, D** 108
Failing of Dempster's rule of interval-given probabilities **Perez, A** 13
Framework of knowledge-based systems — multiple metal-level architecture for representing problems and problem-solving processes **Ohsuga, S** 204
Goal-driven blackboard control architecture based on extending partially complete general goal trees **Kuru, S and Bek, F** 236
Grouping knowledge-based data into distributable clusters **Bobbie, P O** 230
Hermeneutics in expert systems **Pospelov, D** 25
Knowledge support systems **Gaines, B R** 192
Knowledge acquisition mechanisms for a logical knowledge base including hypotheses **Ishizuka, M and Matsuda, T** 77
Knowledge represented by mathematical models for fault diagnosis in chemical processing units **Lutcha J and Zejda, J** 32
Knowledge-based reconstruction **Vysoky, P** 17
Mapping rule-based systems into neutral architecture **Fu, L M and Fu, L C** 48
Model-preserving transformations of databases for rule-based expert systems with Boolean-valued weights **Kramosil, I** 21
Music composition as hypothesis formation: a blackboard concept of musical creativity **Laske, O E** 36
Nonmonotonic reasoning and logic programming **Jirku, P** 28
Propa: a papaya management expert system **Itoga, S Y, Chia, C L, Yost, R S and Mau, R F L** 163
Systems development life-cycle for expert systems **Agarwal, R and Tanniru, M** 170
The logic of design actions **Coyne, R** 242
Using errors to direct design **Booth, P A** 67

SUBJECT

Books 57, 122, 181
Calendar 127, 184, 259
